

PRIMEWARE

The Carvery Tray

The perfect way
to Carvery Display

The Carvery Tray is a simple yet effective way of serving roast meat. The Tray will easily display two small joints or one large joint and is available with spikes or with an Apex ultimate cutting board.

Clients using our popular Carvery Hot Tile - which fits on top of a GN1/1 bain marie well - requested a Carvery Tray to sit on a ceran counter. They wanted more spikes so it would hold two joints and asked if it could be compatible with the latest induction technology - we listened!

The carvery tray is a simple yet very effective way of serving roast meat. The Tray will easily display two small or one large joint with 12 spikes to hold the meat in position for ease of carving.

The Carvery Tray is supplied with a non slip, heat resistant mat enabling it to be placed on any ceran or solid top servery counters. The tray absorbs heat from the servery counter and is then ready for use. It can also be used on a buffet for immediate service.

The tray has two handles for ease of use and weighs just 3kg. It measures 530 x 330 x 5mm, GN1/1 size and is made of stainless steel with black and white mosaic tiles around the edge. Between the mosaic and the carvery a 0.5mm well is designed to catch meat juices.

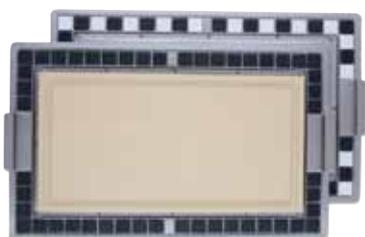

Primeware provides a systematic approach to food display. Their elegant modular sized dishes are ideal to use alongside the Carvery Tray.

Primeware's Multi-Portion dishes are designed for use in hot and cold countertop food displays.

Carvery Trays and Carving Boards

The Carving Tray with Ultimate Carving Board
