

TAKING GOOD CARE OF YOUR PRIMEWARE HOT TILES, HOT TRAYS & CARVERY TILES/ TRAYS.

- Please remember to always handle your Primeware products carefully. The ceramic and glass Hot Tiles can be cracked or scratched if they are dropped or knocked.
- DO NOT WASH your Hot Tiles/Trays in a dish washer. Simply clean by hand using a mild dishwashing detergent with hot water and a soft brush or plastic pad to scrub gently. Use a normal disinfectant soapy liquid following the maker's instructions for dilution and use. If you clean your Hot Tiles/Trays daily you will find they reward you with a very long life and excellent sparkling appearance.

INSTALLING YOUR PRIMEWARE HOT TILES.

- Open the delivery carton carefully and remove your Primeware Hot Tile/Tray from the carton and plastic packaging.
- Wash and sanitise the Primeware Hot Tile/Tray before use.
- Place the Hot Tile/Tray on to the servery counter. Normally the product will be used to drop in and cover the GN1/1 servery cut out to improve food service presentation, but there are other uses.
- Turn on the servery counter heating source which may be both above and below the Hot Tile/Tray. Your Hot Tile/Tray will work effectively whether the heat source is dry electricity or wet steam.
- After service is completed remove the product, wash and sanitise using the instructions above.
- Return the cleaned Hot Tile/Tray to the servery counter ready for use.
- When stacking this product outside of the counter, place the metal edges together rather than the ceramic Tiles to avoid damage.
