## Hot Counter with silicone GN Flexepans

### Product Guide

#### Hot Tiles

Hot Tiles drop in the well of a counter or chafing dish to create a solid top on which to present food or display food in dishes.

The Tiles absorb the ambient temperature and on a hot counter will be ready to use in minutes. They have feet on the back to locate in the well to prevent the tile moving.

Our new Batik design now comes in 4 colours: red, blue, green & black.

#### Flexepans

Tough, unbreakable silicone oven-to-counter dishes for cooking & serving. Available in 5 colours: black, white, red, blue & green and in 7 GN sizes.

Lightweight, dishwasher safe, easy to use and available with lids ....say goodbye to chipped or dented dishes!
